About Me

Self-taught full-stack web designer and developer with over 6 years of programming experience. Developing beautiful and accessible user interfaces for websites and web apps at Mizzen Software. Fascinated by technology and always learning more.

Experience

Frontend Developer @ Mizzen Software

MAY 2018 - PRESENT // Part-Time

- ▶ Worked alongside a team of three to design and develop accessible and responsive websites for companies and individuals using HTML, CSS, and JavaScript with jQuery.
- ▶ Increased existing client's websites SEO by nearly 40%
- ▶ Fixed bugs for existing sites and significantly improved performance and load times by upto 48%
- ▶ Designed brand logos and vector graphics in Adobe Illustrator.
- ▶ Developed in-house software using Python for faster tests and development.

Full-Stack Web Developer as Freelance

DEC 2017 - PRESENT // Part-Time

- ▶ Designed and developed a multitude of website projects for various clients across the world.
- ▶ Built custom websites using Bootstrap and Wordpress, including custom plug-ins and filters.
- ▶ Engineered intelligent custom made chat bots for websites and messaging applications for companies and other specific use cases.
- ▶ Developed a couple of native Android and iOS apps using Flutter with Dart.
